**Subject:** Shiloh Work Plan/RPP  
Shiloh Rad Removal Work Plan.DOCX  
Shiloh Radiation Protection Plan.docx

Updated versions attached. Once I'm in the office (about 9 AM, unless [Nonresponsive based on revised scope] want to knock it out first), we can add the figures, address any additional comments, and submit a pdf version.

One note I changed – the limits for the conex box's, I adjusted to indicate that the exterior of the conex box will not exceed 2 mR (limit for public protection) and the interior will not exceed 5 mR (limit for creating a radiation area). This gives us a little more leeway in the work plan, while still keeping us below any additional signage or public exposure requirements. If anyone has any questions or concerns with this, let me know. I just don't want to unnecessarily require additional conex boxes out there.

Also FYI, I postponed my Texas work, so if things carry on past one week, I can still be down there to assist.

Thanks!

[Nonresponsive based on revised scope]
